

**PRASIDDHI SOLAR Pvt.Ltd.**

*Harnessing the power of Sun...*

**INVEST ONCE.  
REJOICE FOREVER.**

[www.prasiddhisolar.com](http://www.prasiddhisolar.com)

Based out of Bangalore, Karnataka, Prasiddhi Solar Pvt Ltd, an emerging brand name in the Indian solar energy sector, offers an array of renewable energy related products with international quality standards. Backed by a superior product range & vastly experienced team with a wide network of service centres spread across the country, Prasiddhi is equipped to cater to any renewable energy requirements while ensuring complete customer satisfaction.

Founded by a group of solar industry veterans with collective experience of about 2 decades in Techno Sales and Operations in the solar energy industry, Prasiddhi, (A MSME approved company) is one of the first companies to establish a dedicated dealer network to serve the requirements of smaller cities and towns across India. Today, a majority of our business comes from selling SPV off-grid, on grid, solar water heaters and UPS in semi-urban and urban parts of India.

Our products and services caters to one objective - customer delight and a testimony to our unwavering customer focus is 5000+ happy customers spread across Karnataka. We will handhold you through each step in the buying process, namely; pre-investment consultation, feasibility study, energy audits, detailed project report, guidelines to attractive financing alternatives, installation & testing, assured after sales service and cost-effective annual maintenance contract. With our strategically spread sales, service centres and dealer network we offer prompt, economical, and reliable services to ensure exceptional customer satisfaction.

So, if you are looking to reduce your energy bills and adapt to an environment friendly energy source. We've got you covered! Schedule a free consultation with our experts to explore, discover and implement customized solutions that can help save energy bills in any location across India.

**Our Vision** is to encourage renewable energy utilization by citizens in their day-to-day lives, by innovating, manufacturing and supplying useful, affordable and efficient renewable energy related products.

**Our Mission** is to provide high quality, efficient, affordable, and hassle-free renewable energy products, backed by effective after sales services, to ensure high customer satisfaction. Also, to contribute in Nation Building by encouraging citizens to utilize renewable energy on a daily basis and therefore help reduce carbon footprint for sustenance of healthy life on the planet.

**Let's choose clean energy and Go Solar.**

## Product Range

### Thermal Projects

- ▶ Available with ETC & FPC System
- ▶ Suitable for Hospital, Hotel, Hostel & all Industrial applications
- ▶ Available from 1,000 LPD to 1,00,000 LPD Capacity (Non-pressurized / Pressurized)
- ▶ More Durable Stainless Steel / Silicon Enamel Coated inner tank for hard water
- ▶ Superior quality 50mm high density PUF insulation to retain Hot Water
- ▶ 7 Tank processed MS Powder Coated Structure
- ▶ High efficient & durable copper collector
- ▶ CPR\*- Pressurized systems for better shower & less wastage of water

### Air Source Heat Pump

- ▶ Robust design
- ▶ 24/7 hot water
- ▶ Suitable for both domestic and commercial applications
- ▶ Can be combined with solar collector
- ▶ Swimming Pool Heating Solution

### Street Light

- ▶ Flexible design based on the requirement
- ▶ Very low maintenance
- ▶ 100% stand alone
- ▶ Cost-effective

## Solar Roof Top On-Grid (Net Metering) Systems

### WORKING PRINCIPLE:

The whole system mainly comprises of:

- ▶ Solar PV Module (SPV Array)
- ▶ Solar PV Module Mounting Structure
- ▶ Grid Tied Inverter
- ▶ Solar PV Modules generates DC electricity in proportion to the amount of sunlight available, generating the most power on a clear day when the sun is at a normal to the Solar PV Modules.
- ▶ These Solar PV Modules are connected in series and parallel to form a Solar Array based on the voltage requirement of the inverter selected.
- ▶ The Solar PV Array is mounted on the Module Mounting Structure (MMS), which are oriented towards the south and tilted at an angle which is optimum based on the latitude of the location.
- ▶ The DC power produced from Solar Array is fed to a grid connect inverter. The Grid connected Solar Inverter will convert DC to AC and export the power to the Utility Grid.

### WHY IS SOLAR ENERGY IDEAL FOR YOUR HOME AND BUSINESS?

- ▶ Solar energy is a clean, pollution free and renewable source of energy
- ▶ Solar helps to reduce the country's carbon footprint and mitigate the impacts of climate change
- ▶ By using solar energy, we can reduce the consumption of fuels like coal, kerosene or gas
- ▶ India has a great potential to generate electricity from solar energy and the Country is on course to emerge as a solar energy hub
- ▶ Solar energy does not emit any gases or chemicals in the air. Solar energy is eco-friendly and helps to decrease global warming and ozone holes
- ▶ Solar power is virtually limitless. As long as the sun shines, you can generate power
- ▶ Solar offers great potential to save money on your monthly utility bill
- ▶ Solar is the most versatile form of alternative energy that doesn't need a large water source
